

# WASHERS

# Nylon Flat Washers

**STANDARD** Tolerances:  $OD \pm .010$ ,  $ID \pm .005$ ,  $T \pm .015$

These washers are made to be used with standard screw sizes #2 up to 1/2. They come in the four most popular thicknesses, from 1/32" up to 1/8". If one of these dimensions

is not quite what you need, don't forget to see our section on special nylon flat washers (pages 187-189).

*Most washers are available in clear polycarbonate where quantities warrant.*

# Nylon Flat Washers CONTINUED

*SPECIAL Tolerances: OD and ID  $\pm .015$ , T  $\pm .010$*

Seal, insulate, absorb shock and vibration. They prevent galling and marring, and may also be used as spacers, guides, bearings, bushings, etc.

For washers thicker than .125", look at our standard and special spacers on pages 136-139. Metric washers can be

found on page 191.

**Other sizes can be tooled for moulding or stamping in any plastic.** Request a quotation, specifying size, tolerance and quantity. See the list at the end of this section for other non-metallic materials available.

*Need longer washers? You might find a solution in our round spacers on pages 136–139.*

# Nylon Flat Washers CONTINUED

## RETAINING

Similar to our standard flat washer, but with a specially configured inside diameter designed to grip the outside of the screw shank. The washer slides on the screw easily, but is retained on the screw.

For use in applications requiring pre-assembly of the screw and washer to reduce final assembly cost.

Other sizes may be tooled on request.

# Nylon Turtleneck Products

**LOCK SEAL WASHERS** Tolerances: ID: + .004, -.003, Wall: ±.002, Height: +.025 -.015

Use with metal fasteners to pressure-seal holes, as a great lockwasher, to prevent galvanic corrosion, to protect glass, porcelain, etc. surfaces from chipping, crazing or cracking. A problem solver.

## TURTLENECK BUSHINGS

With inside sleeve lengths of 1/4", 1/2" or 3/4", these have all the uses of the washer plus the function of a shoulder washer, screw insulator, or simply a bushing where space is restricted.

## THIN WALL NYLON TUBING

The nylon tubing used to make the turtlenecks can be cut to your specifications.

## Nylon Finishing Washers

These washers protect cabinets from scratching, cover misaligned holes, etc. May also be used as glides, bumpers, feet and spacers.

# Nylon Shoulder Washers/Screw Insulators

*SPECIAL* Tolerances all dimensions:  $\pm .015$

Suitable for a variety of insulation and mechanical applications. They seal, reduce vibration, act as spacers, guides, bushings and bearings. Isolate metal screws electrically and reduce corrosion. They can also be used as light load

bearings in many applications.

Shoulder washers are shown with the prefix **NSW**. Screw insulators are for standard screw sizes (#2 up to 1/4) and are shown with the prefix **SC**. Shoulder washers can often be interchanged with

screw insulators, but they tend to have a shorter shank (L dimension).

**Custom sizes can be tooled for moulding.** Please specify size, quantity and tolerances when requesting a quote.

## Washer Information

### 10 REASONS TO USE NON-METALLIC WASHERS

Non-metallic washers have it all over metal in many applications – and they cost less. A lot of companies already appreciate the various advantages of washers made from nylon, fibre, felt, acetal, rubber, cork, sponge and other non-metallic materials. Each has certain characteristics that make it most suitable in particular situations. If you don't yet know the advantages of each, allow us to enlighten you.

- 1. Excellent Wear Resistance.** You may not believe it, but some of our non-metallic washers outwear metal parts by as much as 20 to 1.
- 2. Internal Lubrication.** Certain non-metallic washers contain a solid lubricant, making them ideal in installations where external lubrication is difficult or undesirable.
- 3. Noise Reduction.** Non-metallic washers absorb noise and shock and reduce chatter and vibration.
- 4. Non-Abrasive.** The non-metallic washers we stock will not gall or scratch mating parts.
- 5. Corrosion Resistance.** Have you ever seen a nylon or fibre washer rust?
- 6. Low Surface Friction.** A low coefficient of friction in some washer materials makes for smoother, longer-lasting operation of almost any product.
- 7. Excellent Sealing.** Non-metallic washers compress under pressure, so they are ideal as seals under unfavourable environmental conditions.
- 8. Insulation Properties.** Our non-metallic washers are an excellent choice for applications involving electricity or temperatures.
- 9. Lightweight.** To minimize the weight of automobiles, airplanes and other products, nonmetallic washers are a sensible alternative.
- 10. Lower Cost.** This is one we all like to hear. Not only do non-metallic washers have all of the above advantages, but they typically cost far less than their metal counterparts.
